

# Streamline Inspections and Enhance Compliance with Aaseya Inspection Solution

Regular workplace inspections help organizations maintain safety, comply with regulations, and prevent costly incidents. With the Aaseya Inspection Solution (AIS), powered by Pega's Agentic AI, inspection processes become faster, smarter, and more reliable.

## KEY CHALLENGES AIS ADDRESSES

### Data Volume

High data volume, fragmented systems

### Time-Consuming

Manual inspections, delays, higher costs

### Accuracy

Inconsistent outcomes, limited standardization

### Compliance

Evolving regulations, high monitoring effort

### Resources

Inefficient deployment, logistical challenges

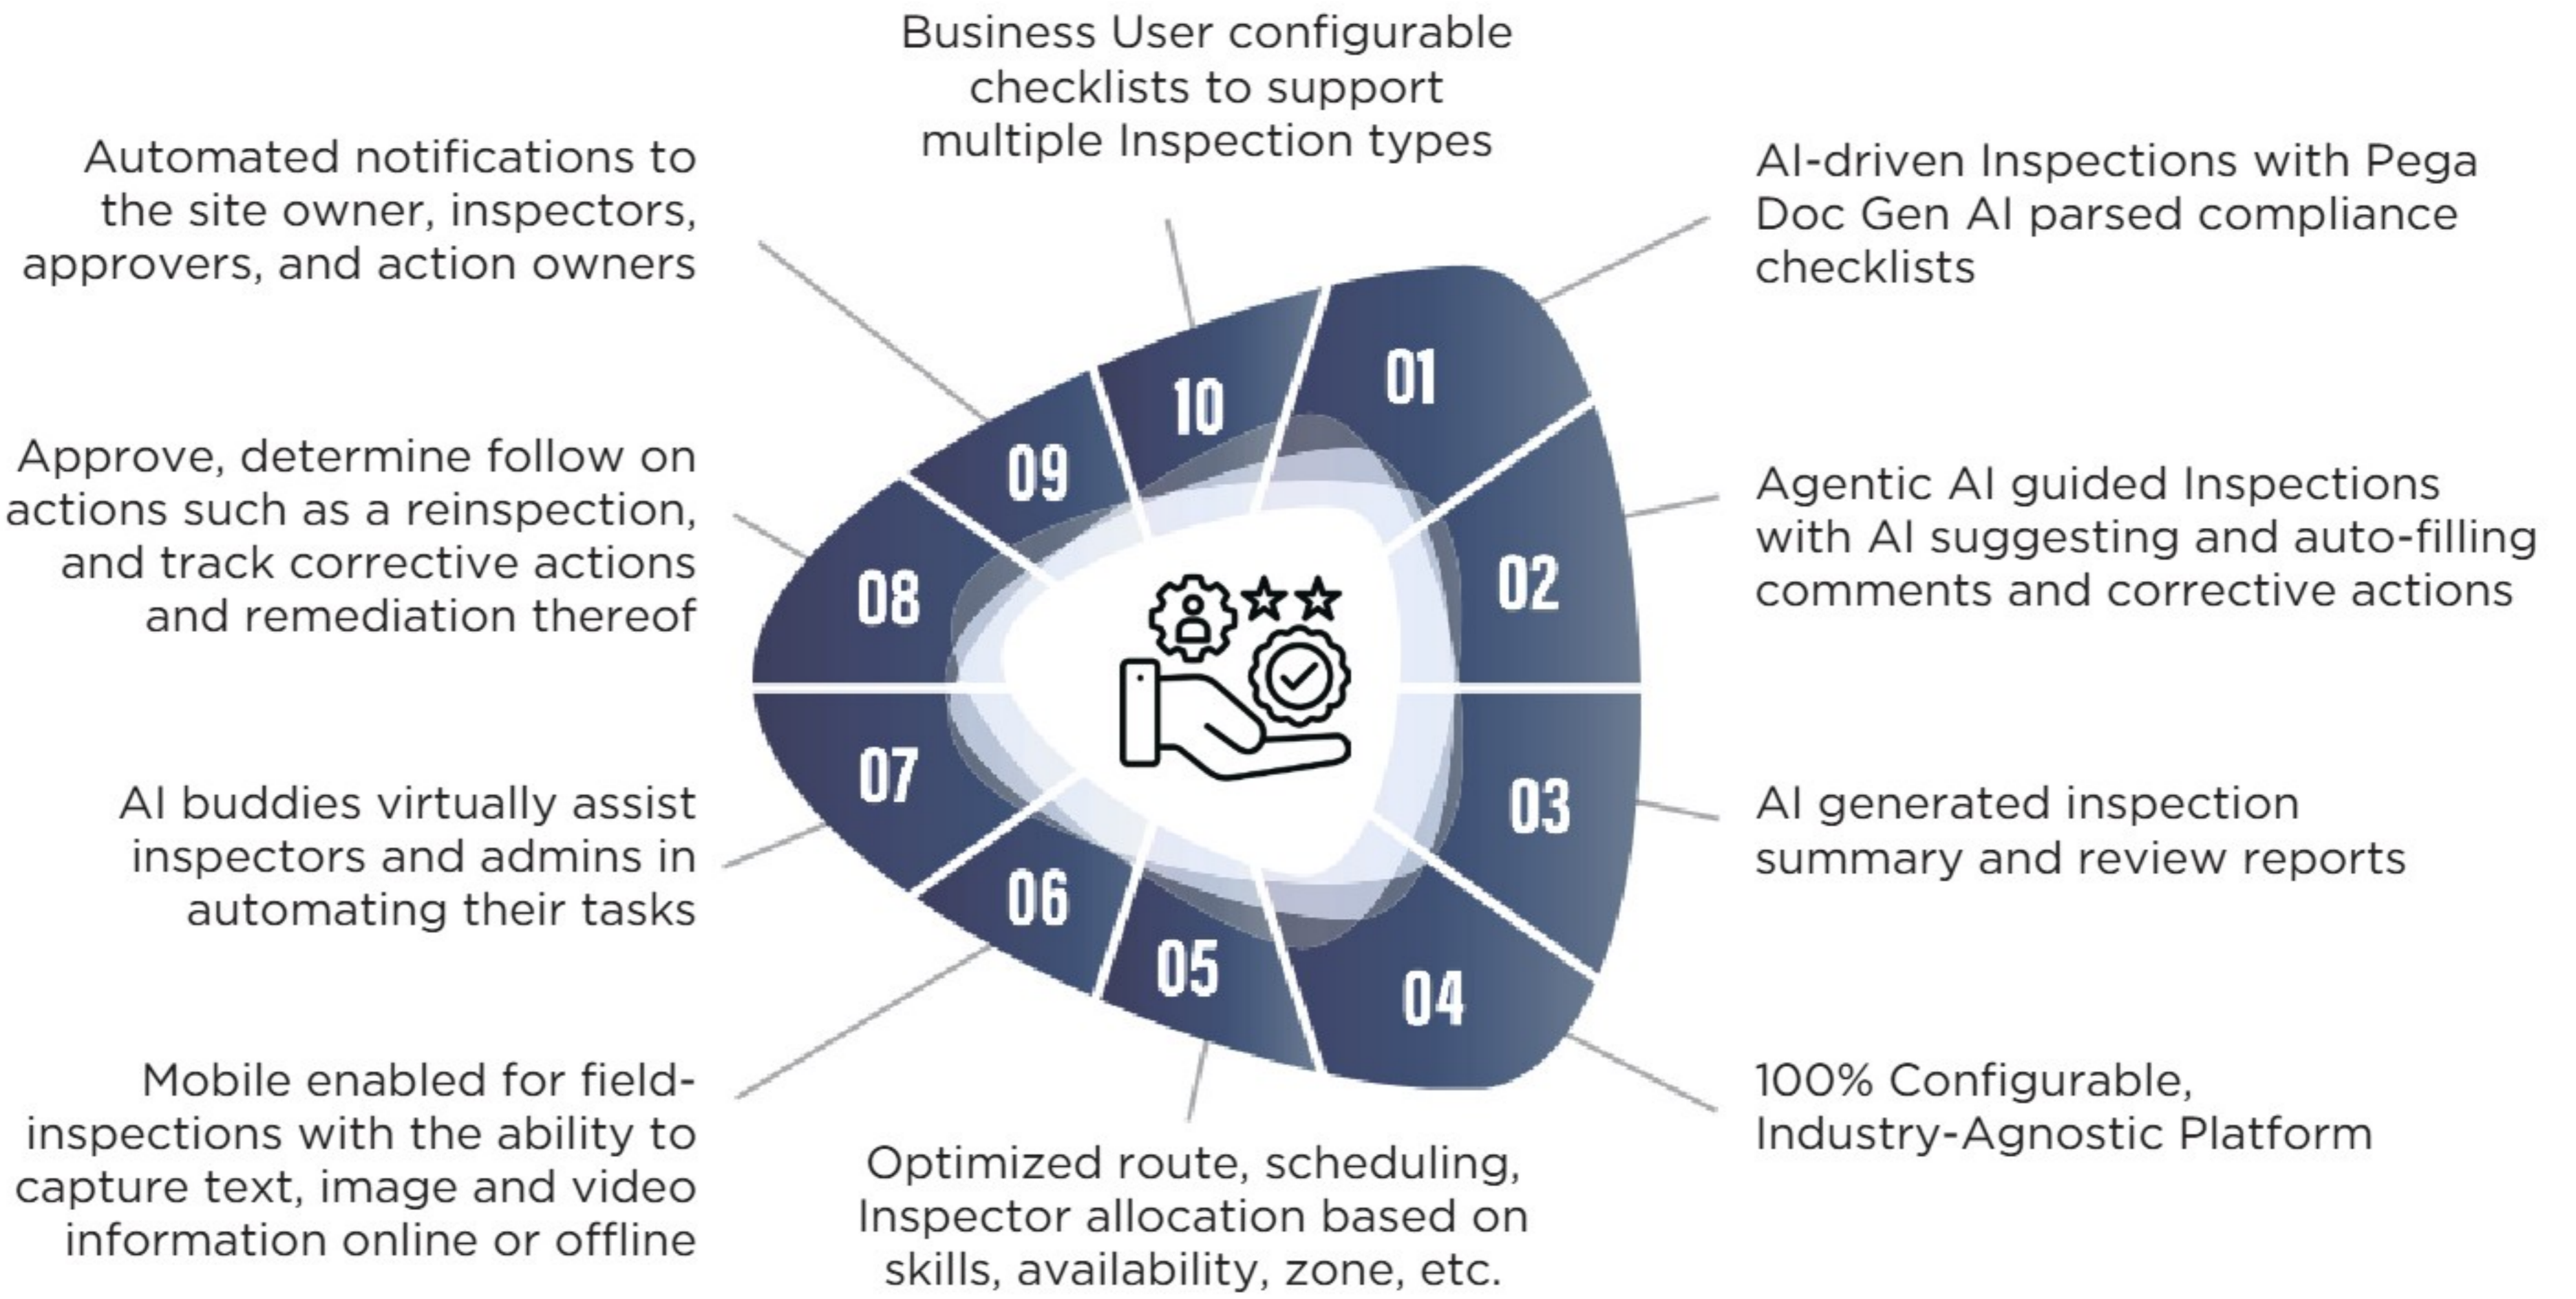

### Training

Continuous upskilling, keeping pace with tech

With the Aaseya Inspection Solution (AIS), a cloud-based, mobile-enabled application, these challenges become manageable.

Available on AWS Marketplace

# AIS delivers these benefits through:

## Case Study

A prestigious and strategic project enabled a Middle Eastern government to conduct inspections (including health and market inspections) using mobile devices and tablets. The system is fully integrated with licensing, GIS, objections, and payment systems to provide a seamless experience. The system is being used by 3 million users and more than 6 million inspections have been carried out successfully.

Enterprise Workflow Implementation - AI-Powered automation combining Pega's low-code platform with computer vision, NLP, and intelligent automation engines. Accelerates deployment for inspections, claims, customer service, and compliance workflows.
