

aaseya

A YASH Technologies Company

Power Your Vision With AI & Low-Code Speed

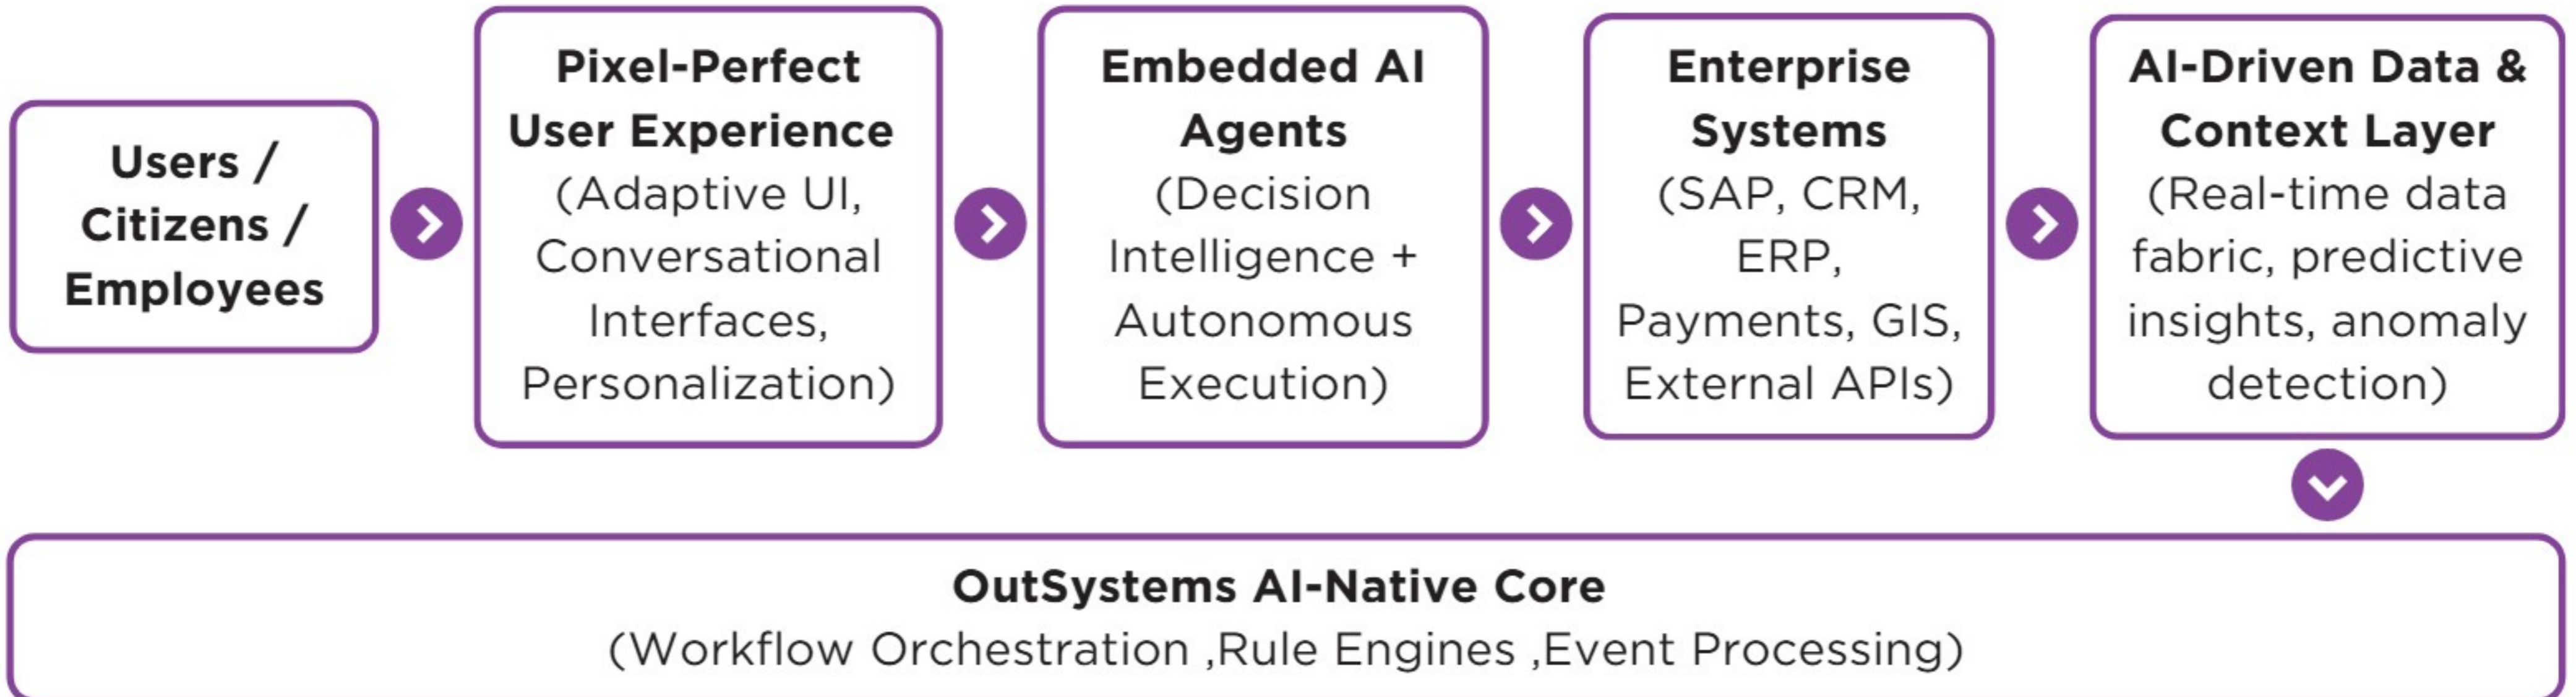

BUILD SYSTEMS THAT THINK,
DECIDE, AND ACT.

EMPOWER YOUR DIGITAL JOURNEY WITH AASEYA'S OUTSYSTEMS SERVICES

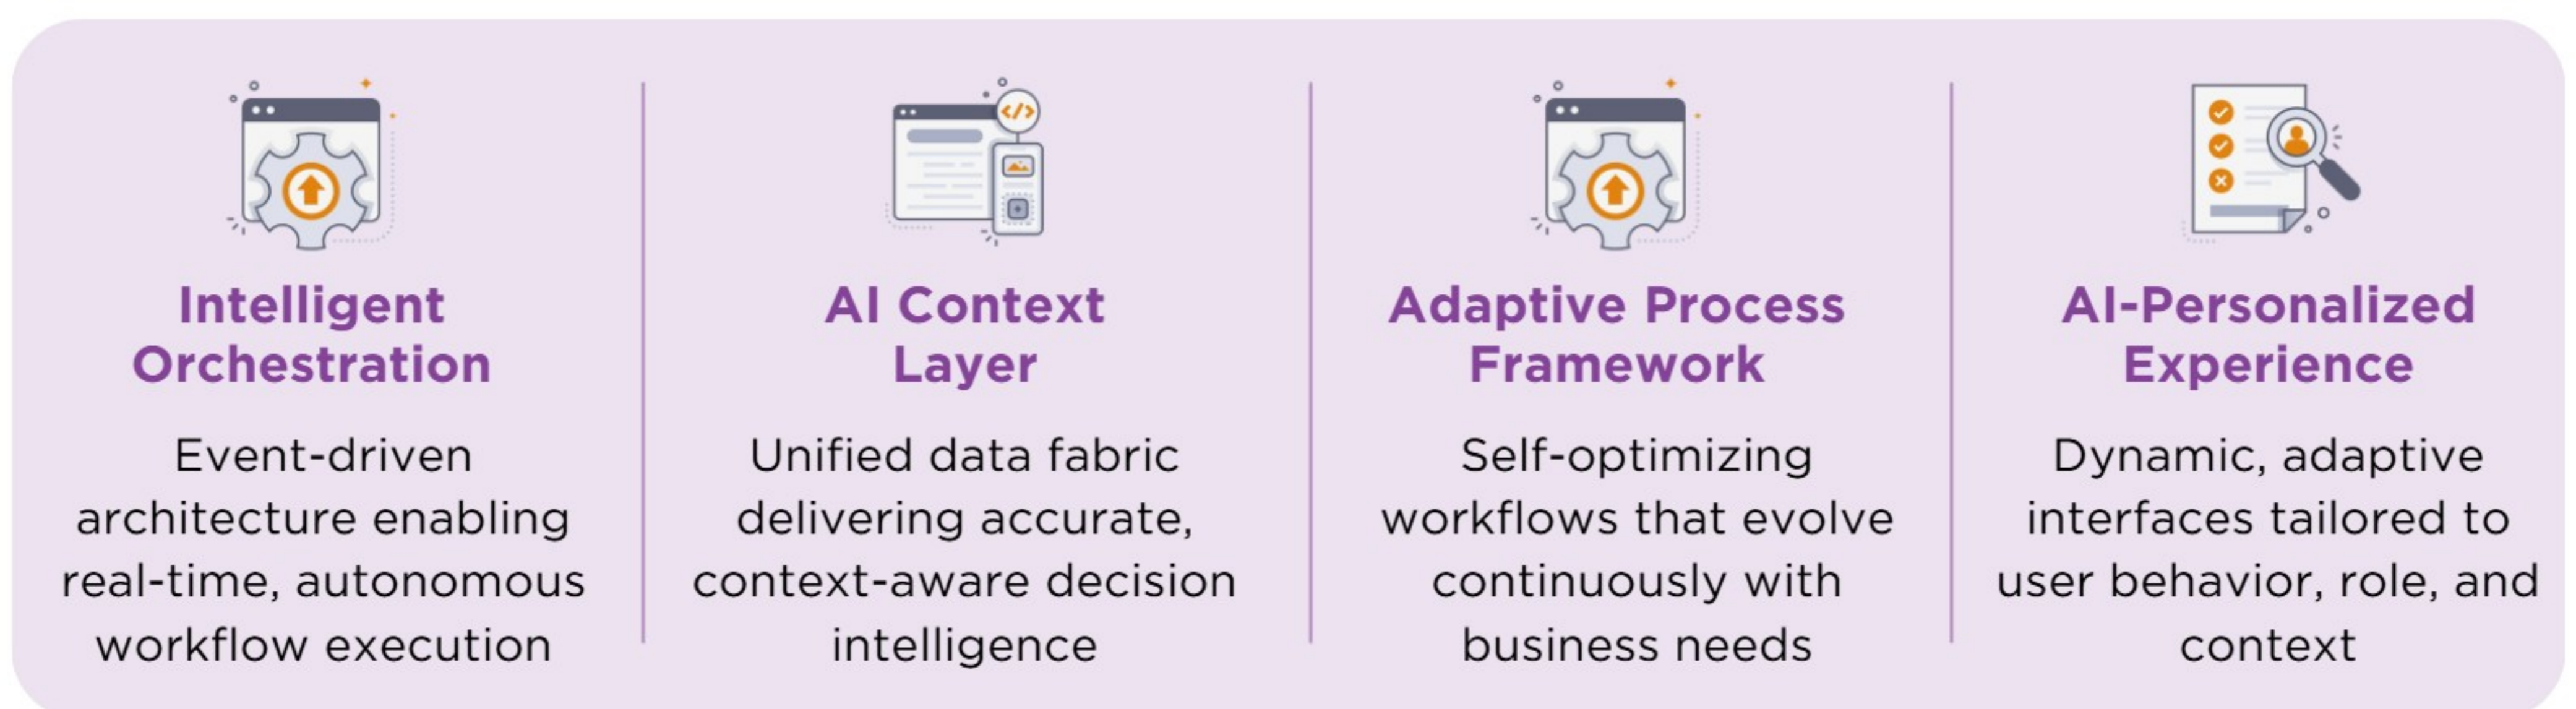

Aaseya delivers enterprise-grade applications built on OutSystems, with embedded AI agents that continuously optimize business processes. Aaseya combines Agentic AI, OutSystems expertise, and deep enterprise integration to help organizations transition from digital transformation to autonomous systems.

Aaseya AI-Led Transformation Vision

Embedded AI Agents across lifecycle

Embedded AI Agents across lifecycle	Drive intelligent engagement across channels with context-aware responses and actions.
Process Execution Agents	Autonomously trigger and complete workflows based on events, rules, and real-time context.
Decision Intelligence Agents	Predict outcomes, identify risks, and initiate corrective or growth actions proactively.
Compliance & Monitoring Agents	Continuously detect anomalies, enforce policies, and ensure regulatory adherence in real time.
Document Intelligence Agents	Extract, validate, and activate insights from structured and unstructured enterprise data.

Consulting Services	AI-Powered Citizen Engagement	AI Transformation Advisory	Flexible Pricing Model
Data Fabric	AI-Augmented Managed Services	Platform Advisory	AI-Assisted Legacy modernization

TRANSFORMING CHALLENGES INTO OPPORTUNITIES WITH AI-ENHANCED SOLUTION ACCELERATORS

vCentral™ — Autonomous Portfolio Management

An AI-driven enterprise portfolio governance platform built to optimize delivery operations, resource management, and commercial oversight. vCentral™ enables intelligent project governance, resource allocation, portfolio prioritization, and revenue visibility to help organizations improve efficiency and accelerate strategic decision-making.

AI CRM — Autonomous Revenue Engine

An AI-powered CRM platform that transforms traditional customer management into autonomous revenue operations. Built with embedded AI agents, it enables intelligent opportunity progression, customer growth, churn prevention, and forecast governance while improving conversion rates, customer retention, and operational efficiency.

AI - Assisted End-to-End Legacy Modernization

An AI-assisted modernization framework designed to transform legacy systems into scalable, future-ready platforms. By combining automated analysis, AI-driven application generation, and intelligent testing, it accelerates modernization while preserving critical business logic, integrations, and operational continuity.

AIS — Autonomous Inspection System

An AI-powered inspection and compliance platform designed to modernize enterprise inspection operations through autonomous workflows and predictive intelligence. AIS™ streamlines inspections, automates evidence validation, optimizes scheduling, and proactively manages compliance risks to improve efficiency and regulatory readiness.
