

# aaseya

A YASH Technologies Company

# Sovereign Intelligence, Engineered.

Production AI capabilities  
designed to plug into  
OutSystems and the systems  
already in your enterprise.

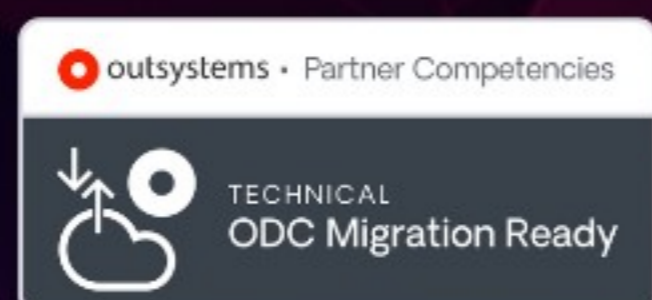

**ENTERPRISE-GRADE**

**OUTSYSTEMS-NATIVE**

**OPEN-SOURCE FIRST**

# PRODUCTION AI CAPABILITIES, DESIGNED TO PLUG INTO OUTSYSTEMS.

Built and deployed for regulated enterprises. Open-source first, sovereign by default, agentic by design — every capability ships with first-class OutSystems integration.

### Computer Vision Platform

Cameras and images become governed actions in OutSystems workflows.

- Multi-camera RTSP · IP webcam · batch
- AI-assisted annotation (SAM 2)
- YOLOv8 / RT-DETR · Triton GPU serving
- Native OutSystems connectors · REST + Kafka
- Edge to data centre · same artefact, anywhere

### Document Intelligence

Transform enterprise documents into trusted, workflow-ready intelligence for OutSystems.

- Multi-format ingestion: PDF, DOCX, XLSX, PPTX, scans, portals
- Multi-language document understanding
- Accurate extraction with full traceability and source provenance
- Advanced table, form, and diagram interpretation
- Structured data model ready for workflow automation and integration

### Agentic Graph RAG

A knowledge backbone that compresses every downstream OutSystems build.

- Hybrid retrieval · vector + graph + structured
- LangGraph state machine · self-correcting
- Citation-grounded, multi-hop answers
- Cross-system investigation, in-the-moment
- On-prem or private cloud · zero egress

### SAP ECC ABAP Analyser

Years of opaque ABAP, turned into low-code-ready dossiers in hours.

- 6–18 months of manual discovery to a single weekend
- AI reads, classifies, and scores every legacy Z-customisation
- Business-language dossiers ready for OutSystems Implementation
- Every claim cited to source — defensible in customer signoff
- 10x lower cost than manual reverse engineering

## OUR CONVICTIONS

### Sovereignty is non-negotiable

0 bytes egress · on-prem or private cloud

### Open-source is the only foundation

100% OSS · permissive licenses only

### Buy outcomes, not tokens

Agents act on your systems · not just answer

# ADVANCED AI CAPABILITIES ACROSS EVERY LAYER OF MODERN AI

Built and deployed for regulated enterprises. Open-source first, sovereign by default, agentic by design — every capability ships with first-class OutSystems integration.

## Agentic systems

Multi-agent orchestration · LangGraph · self-correcting loops

## Knowledge graphs & RAG

Hybrid retrieval · vector + graph + structured

## Computer vision

YOLO · RT-DETR · Triton · multimodal AI

## Document intelligence

Multi-format · multi-language · provenance-grade

## Fine-tuning

Domain adaptation · open-weights · structured outputs

## LLMOps & evaluation

DeepEval · LangFuse · CI quality gates

## Sovereign deployment

vLLM · on-prem · private cloud · zero egress

## Responsible AI

Audit logs · explainability · governance overlay

## LET'S BUILD.

**Pick one capability. Give us six weeks. We'll show you production.**

# WHY AASEYA?

**600+**  
CONSULTANTS

**9,000**  
GROUP EMPLOYEES

**13+**  
COUNTRIES

**30+**  
AI SPECIALISTS

4.8/5 customer satisfaction

Backed by  
YASH Technologies

## Sovereign Intelligence, Engineered.

Agentic AI for Enterprise Delivery
